

Top View Of Column/Post

With access panel removed, set canopy on top of column and attach using (4) " flat¹/₂" washer, lock washer and hex nuts supplied, to the under carriage of the canopy to secure it down. After top is secure, attach spring to stop pin, then attach to tensioning angle, using the ³/₈" eye bolt. Pull some tension around ¹/₂ the length of the threads should be enough. At this point it is time to test, swing, and rotate the canopy 90 degrees and release it. Adjust the tension to achieve a smooth and complete return. Lock the two hex head nuts together. Run the electrical to the light fixture, (by a qualified electrician). Then reinstall access panel. Pull primary wires from electrical box on the base of the post and hook up to the power source. (By a qualified electrician).
